Big data is probably the single most important trend in information usage for both business and IT in the past decade. It is changing the way companies make decisions, do business, succeed. Industry experts categorize big data as data that has one or more of the following characteristics:

Velocity | Variety | Volume

Our specialty Workforce Snapshot:

36+ Hadoop Developers

4+ Hadoop & Unix Admins

20+ Big Data Experts

10+ Custom Cloud App Developers

20+ Mobile App Developers

Big Data Opportunities:

World's data is doubling every two years.

- ✔ 1.8 zettabytes (1.8 trillion gigabytes) will be created and replicated in 2011
- ✔ By 2020 there will be 35 zettabytes of information created
- ✔ IT staff will grow at a rate of less than 50 percent over the next decade from 15 million in 2010 to just 22 million in 2020
- ✔ By 2015 nearly 20 percent of information will be "touched" by cloud computing service providers
- ✔ By 2015 over 20 percent of information running through servers will do so on virtualized systems
